

PVC hose with embedded spring KF 16/2000

ZÁK. ČÍSLO: 2934 68 0000

PVC hose is structural component designed for flexible connections in vacuum instalations. Flexible robust hose is reinforced with embedded steel coil and hose cover is from transparent PVC. Working temperature is from - 5 to 65 °C. The minimum bending radius is applicable for a temperature of 20 °C. The bending radii increase at larger temperatures up to factor 1,5 at 50 °C.

Technické údaje

| | |
|-------------------|---|
| Inner tube | PVC, transparent |
| Casing | steel coil |
| Surface of hose | Smooth inner and outer walls |
| DN | 16 |
| Bending radius | 50 mm |
| Dimensions (L) | 2000 mm |
| Pressure range | 1 x 10 ⁻⁴ hPa to 500 hPa over pressure |
| Temperature range | -5 to 65 °C |
